

7 Lever Dead Bolt Rim Lock 2201

Product Description

A range of 7 lever rim locks with a dead bolt closing action available in a zinc plate finish. Ideal for use on many applications these locks are commonly found on enclosures, post and parcel boxes. These locks are normally supplied with the key free in the locked and unlocked positions, however they can also be supplied with the key trapped in the unlocked position. The fixing holes as shown on the technical drawing (below) are standard, but can be varied to suit individual requirements.

- **Lock Combinations:** 900
- **Standard finish:** Zinc plate
- M Keyed system supplied as standard
- Locks operated by flat-type key
