

High Security Dual Tumbler Lock

Product Description

The innovative high security dual tumbler (HSDT) lock is the most secure lock in our range thanks to its patented locking system. With more than 380 million combinations, this lock has a significantly higher picking and higher torque resistance due to the patented number and alignment of tumblers in the cylinder.

- **Combinations:** More than 380 million
- **Ultra secure combinations:** 200,000
- **Patent number:** EP19 020 358.8 - 1005
- Lock combinations encoded to provide extra layer of security
